OVERVIEW

As a front-end developer with expertise in UI/UX design, I bring over 4 years of experience in crafting engaging and user-friendly web interfaces. Utilizing tools like Figma, I translate design mockups into interactive prototypes, ensuring seamless collaboration with design teams. With a keen eye for design and proficiency in HTML, CSS, and JavaScript, I create visually stunning and responsive websites. Leveraging frameworks like Angular and React, I develop dynamic and interactive user experiences while prioritizing cross-browser compatibility and accessibility standards. Collaborating closely with design and back-end teams, I strive for excellence in delivering intuitive digital solutions that exceed user expectations and drive business objectives.

EDUCATION

- ❖ **University of Greenwich** 2015 - 2019
